

At Home

Draw a picture of items that use electricity. Place the item that is of most importance to you at the top of the pyramid and the least important items at the bottom.

The diagram consists of five empty rectangular boxes arranged in a pyramid shape. The top row has one box. The middle row has two boxes. The bottom row has three boxes. These boxes are intended for students to draw items that use electricity, with the most important item at the top and the least important at the bottom.
