Shape Monsters ▶ Play Game

Shape Monsters is a fun, interactive 2D shapes game where children need to identify and match circles, rectangles, squares and triangles.

Each Shape Monster only 'eats' shapes which match its own body shape. When a child correctly selects a shape, that Shape Monster audibly reinforces the name of the shape.

Addition to 10 ▶ Play Game

Our Addition to 10 game is aimed at young children who are being introduced to the concept of addition. Children are presented with a series of addition questions in the conventional format which include plus signs. Two boxes feature the corresponding number of animals which need to be added together.

After children successfully solve each calculation, the animals move to a number line below. This provides useful reinforcement of the concept of addition. The game works well on an interactive whiteboard in a whole class or group situation.
